## Problem Statement

You will be given a list  $A$  of size  $N$ . You need to sort those values in ascending order and also you need to remove any duplicate values from the list and print the final outcome.

## Input Format

- First line will contain  $T$ , the number of test cases.
- The first line of every test case will contain  $N$ .
- The second line of every test case will contain the list  $A$  of size  $N$ .

## Constraints

1.  $1 \leq T \leq 100$
2.  $1 \leq N \leq 10^4$
3.  $-10^9 \leq A_i \leq 10^9$ , Here  $i \leq 0 < N$

## Output Format

- Output the final list.

## Sample Input 0

```
6
8
3 10 0 6 9 5 10 10
2
7 3
6
7 8 2 0 6 3
4
6 2 0 1
10
10 0 7 8 5 3 0 3 0 4
9
9 3 7 10 6 9 0 6 3
```

## Sample Output 0

```
0 3 5 6 9 10
3 7
0 2 3 6 7 8
0 1 2 6
0 3 4 5 7 8 10
0 3 6 7 9 10
```
